If you are like most people in this extraordinary scoring range, you have a strong desire to improve even further. This is where we can help. However, not necessarily by focusing on a better financial strategy. You are already doing very well in that area. We can help you improve your Financial score by focusing on the other 11 categories of your life, because that is where “the financial edge” that eludes so many others can be found. The key to taking your Financial Life to even higher levels can be found in improving your Health and Fitness, your Intellectual Life, your Life Vision and most importantly, your Career and your Character. The next page of this report describes the 2 most important “Support Categories” for your Financial Life. Please read this section carefully, as it may well hold the secret to increasing your Financial score.

YOUR CATEGORY OF CONNECTIVITY

Character

This is the support category for your Category of Key Focus.

All 12 Categories of your life are profoundly connected. They all support each other and are supported by each other. That is why none of them can be left out, or left behind, or left to chance. It is no secret that a powerful connection exists between your Financial Life and your Career. Your Career is where your money is made year after year. A successful Career usually leads to an abundant financial life (though not always). By developing the clarity to identify and pursue your ideal Career path, you have in your hands the power to increase your income and your financial abundance. However, developing a good Career is only one of the things that is required in order to enjoy a healthy financial life… What you may not know is that an especially powerful connection also exists between your Financial Life and your Character. The Character Category focuses on the very foundation of who you are as a person and determines, for better or worse, the path your Financial Life will take. How do you behave with regard to your money? How do you view it? How do you treat it? What kind of Character traits could you cultivate that would increase your Career success and your financial abundance? Self-discipline? Consistency? Persistence? The answers to these questions will determine your level of financial success. Very few people have taken the time to clearly define what kind of a person they need to become in order to have the best Financial Life possible. The benefits to doing so are immense, because these two categories are strongly connected. Please see Our Recommendations in the last section of this report.
